PROFESSIONAL SUMMARY

Bachelor's graduate in Systems Engineering with knowledge in software development, web development, databases, and agile methodologies. Experience in full-stack projects and desktop applications using Java, C#, React, Node.js, Express, Oracle, SQL Server, and MongoDB. As a systems engineer, I bring the ability to analyze needs, design functional technology solutions, and develop them with good practices, organization, and teamwork, from requirements analysis through delivery. Thanks to my experience in sales and customer service, I understand user needs, communicate clearly with both technical teams and non-technical people, and work with commitment to meet goals and objectives. Responsible, proactive, and problem-solving oriented, with a willingness to keep learning and add value to the team.

EDUCATION

Universidad Internacional San Isidro Labrador (UISIL)
- Licentiate Degree in Systems Engineering — In progress
- Bachelor's Degree in Systems Engineering — 2026

Colegio Nocturno de Pérez Zeledón
- High School Diploma (Bachiller en Educación Media) — 2023

Programa Empléate | American English
- Digital Skills with Artificial Intelligence — 2026

PROFESSIONAL EXPERIENCE

Tigo — Sales Agent — 09/2025 – 12/2025
- Customer service and advisory · Sales management · Achievement of targets

Coopealianza — Sales Advisor — 04/2025 – 07/2025
- Customer service · Sales advisory · Achievement of goals

Pipe Shop / Latinos Urban Store — Sales Advisor — 10/2022 – 01/2023
- Customer service · Sales · Product organization and management

FEATURED PROJECTS

Multi-Vendor Marketplace — *React · Node.js · Express · MongoDB · GitHub*

E-commerce platform developed using the Scrum methodology.
- Multi-vendor front-end and back-end architecture; integration with MongoDB Atlas and version control with Git/GitHub.
- Management of user stories, backlog, and sprints in GitHub Projects; team coordination as Scrum Master.

Digital Catalog for an Art Museum — *Java · JavaFX · Oracle 21c XE · Scene Builder*

Desktop application for managing and browsing a digital catalog of artworks.
- Interface built with JavaFX and Scene Builder; object-oriented programming; data managed with Oracle 21c XE.

Web Applications with C# and ASP.NET — *C# · ASP.NET · MVC · SQL Server*

Web applications focused on information and process management.
- MVC architecture and features built with C# and ASP.NET; integration with SQL Server databases.

SKILLS

Programming	Java · C# · JavaScript · SQL · HTML · CSS
Development	React · Node.js · Express · ASP.NET · MVC · JavaFX
Databases	Oracle · SQL Server · MongoDB · MongoDB Atlas
Tools	Git · GitHub · Visual Studio · NetBeans · VS Code · Scene Builder
Methodologies	Scrum · Agile · GitHub Projects
AI & Productivity	ChatGPT · Microsoft Copilot · Google Gemini · Perplexity AI · Canva AI · Prompt engineering · Microsoft Office · Excel · Collaborative platforms · Cloud storage · Basic task automation
Data & Security	Data and information analysis · Dashboards · Digital document management · Intermediate-level cybersecurity · Data protection · Multi-factor authentication · Safe browsing
Soft Skills	Assertive communication · Active listening · Emotional intelligence · Empathy · Teamwork · Leadership and coordination · Problem solving · Analytical and critical thinking · Proactivity · Time management and organization · Adaptability · Customer focus · Responsibility and commitment · Attention to detail · Working under pressure · Negotiation · Self-learning

LANGUAGES

Spanish: Native | **English:** B2
